

# Industrial Gearbox / Speed Reducer

Heavy Duty Power Transmission Solution

This industrial gearbox is designed for efficient power transmission and speed reduction in heavy-duty industrial applications. It ensures high torque output, durability, and smooth operation in environments such as cooling towers, conveyors, and process industries.

Parameter	Specification
Type	Industrial Gearbox
Material	Cast Iron / Alloy Steel
Gear Type	Helical / Bevel
Power	1 HP – 100 HP
Output Speed	10 – 150 RPM

Efficiency	90% – 95%
Mounting	Foot / Flange

**Key Features:**

- High Torque Output
- Low Noise Operation
- Energy Efficient
- Heavy Duty Construction
- Long Service Life

**Applications:**

- Cooling Towers
- Cement Plants
- Power Plants
- Material Handling Systems
- Industrial Machinery
