

Industrial Gearbox / Speed Reducer

High Efficiency Power Transmission Solution

This industrial gearbox is designed for efficient power transmission and speed reduction in heavy-duty applications. It is widely used in cooling towers, conveyors, and industrial machinery. The robust construction ensures durability, high torque output, and long service life.

Parameter	Specification
Type	Industrial Gearbox / Speed Reducer
Material	Cast Iron / Alloy Steel
Application	Cooling Tower / Conveyor / Machinery
Gear Type	Helical / Bevel
Power	1 HP – 100 HP
Speed	10 – 150 RPM Output
Efficiency	90% – 95%
Mounting	Foot / Flange Mounted

Key Features:

- Heavy Duty Construction
- High Torque Output
- Low Noise Operation

- Energy Efficient
- Long Service Life

Applications:

- Cooling Towers
- Material Handling Systems
- Cement Industry
- Power Plants
- Industrial Machinery
