

Industrial Pneumatic Actuated Valve

This heavy-duty pneumatic actuated valve is designed for efficient control of air, dust, and bulk material flow in industrial applications such as cement plants, power plants, and material handling systems.

Parameter	Details
Usage	Material Flow / Air Flow Control
Type	Pneumatic Actuated Valve
Structure	Flanged Rotary / Damper
Media	Air, Dust, Powder
Pressure	Up to 10 Bar
Temperature	Up to 200°C
Material	Mild Steel / Stainless Steel
Connection	Flanged
Power Source	Compressed Air (5–7 Bar)

Key Features:

- Heavy Duty Construction
- Low Maintenance
- Leak Proof Design
- Easy Installation
- Suitable for Industrial Applications
