

# Rotary Feeder for Silo

## Efficient Material Handling Solution

Rotary Feeder for Silo is a heavy-duty industrial equipment used for controlled feeding of bulk materials like powder, ash, cement, and granules from silos. It ensures uniform discharge, airlock sealing, and efficient material handling in various industrial applications.

Parameter	Specification
Type	Rotary Airlock Feeder
Application	Silo Discharge / Material Feeding
Material	Mild Steel / Stainless Steel
Capacity	Customizable (TPH based)
Rotor Type	Open / Closed Rotor
Drive	Geared Motor
Speed	10 – 60 RPM
Temperature	Up to 250°C
Pressure	Up to 1 Bar
Connection	Flanged
Finish	Industrial Coating

### Key Features:

- Uniform Material Feeding
- Airlock Sealing Design
- Heavy Duty Construction
- Low Maintenance
- High Efficiency
- Long Service Life

### Applications:

- Cement Industry
- Power Plants
- Steel Plants
- Food Processing Units
- Chemical Industry
