## About Us

**MINI FLOW PUMPS** is considered as a well known entity that offers high performing **Dosing Pumps** and **Spare Parts** for ensuring effective solution of pumping. We came into existence in the year **2017** itself as a trustworthy **Manufacturer** of pumps and their spare parts such as Metering Dosing Pumps, Electronic Dosing Pumps. Owing to our excellent quality of offerings, we are efficiently catering to the pumping requirements of marine, pharmaceutical, chemical and construction industries. All the aforesaid products are marketed under the brand name of **MINI FLOW PUMPS**. Apart from this, we aim to acquire a better position in the market with our futuristic and client centric approach. Our company is having a state-of-the-art facility that enables us to manufacture the complete product line efficiently. We also endeavor to help our esteemed clients by offering them perfect pumping solutions at market leading rates. Our firm has established a strong foothold in the marketplace with the assistance of competent professionals. These experts put their best efforts to offer premium products to valued customers.

Further, our ability to meet clients' requirements and transparency in working system aid us to attain a huge client base and help us in building strong association with some reputed entities of the respective domain.

## Quality Assurance

We follow a streamlined total quality management system that is suitable for both the customers and company. For manufacturing high performing pumps, we source qualitative components and other materials only from authentic vendors of the market. Also, we have constructed an in-house quality checking department, where all the tests are conducted using advanced testing equipment. The entire range of pumps and their spare parts are inspected on the parameters of performance, efficiency and corrosion resistance.

## Infrastructure Facility

We have a technologically advanced and well developed infrastructure that is installed with contemporary tools and machinery. This facility is supervised and maintained by the experts who are well versed in operations of such sophisticated technology. Under the same roof, other departments like production, R&D, quality testing and packaging work seamlessly harboring a common goal, ie, attainment of high success in markets.
