About Our Company

Heli Insert Fasteners, was established after well analyzing the fasteners requirements in many industries and our focus since then only is to set benchmarks in the market as a **manufacturer** and **exporter**. The wide range of inserting components and fasteners that we deal in consists of **Heli-Coil Free Running Inserts, Heli-Coil Screw Lock Inserts, Heli-Coil Wire Thread Inserts and Heli Locking Nuts**. In the production of these inserts and allied products, cutting-edge technology has been employed by us as we give importance to quality and quantity production both. In the assembling of the machinery, engineering equipment, tools and allied operations in the metalworking industry, our gamut is used.

We manufacture these inserts and fasteners in a number of given specifications and sizes by using A-grade raw materials like SS304, SS316, Inconel X750, etc., so that its suits the application requirements well. The range is polished with protective coatings as it prevents it from getting damaged due to rust, abrasion, etc.

Manufacturing Excellence

We feel proud to provide quality wire thread inserts that are designed in varied sizes, lengths, and pitches. They are available in UNC, Metric, UNF, and British Standard (BSP, BSW, BSF) thread forms.

We quality products developed using phosphor bronze, aerospace quality A2/304 stainless steel and A4/316 stainless steel, and Inconel X-750 in screw locking and free running type.

We can also develop specially finished inserts in different platings and coatings such as cadmium, zinc, silver, and dry film lubricant in different colors from red, green, and blue dye.

Available Thread Forms:

Metric

UNF

UNC

BSF

BSW

BSP

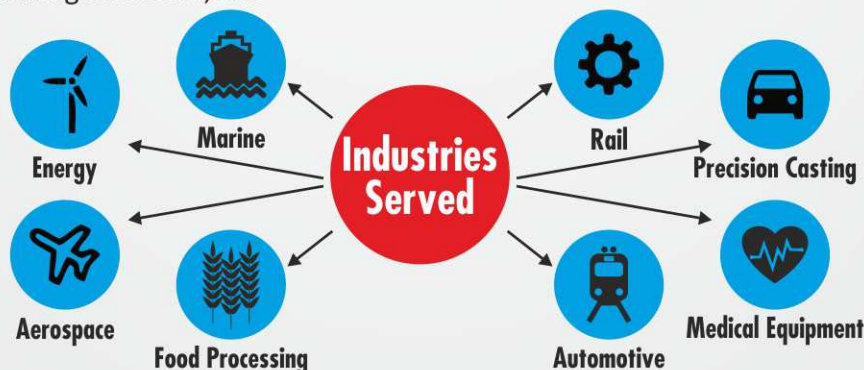

BA

Our wire thread inserts are high in performance in comparison to other leading brands as they are precision engineered as per the national and international standards.

Quality Control

In the production of Industrial Tools and Fasteners under the brand name of Heli Coil, strictest quality standards are being followed. Some of our major concerns in quality control are:

- Manufacturing with zero-defect within promised timeline.
- Fulfill client's requirement with changing market scenes and advancing technology.
- Inspect final items on international standard basis.
- Create awareness among the employees for implementing quality policy.

Industries We Deal

The range we are bringing in the market including **Heli-Coil Screw Lock Inserts, Heli-Coil Wire Thread Inserts, Heli-Coil Free Running Inserts and Heli Locking Nuts** has endless applications in numerous fields. The industries we deal in are **Aerospace Industries, Aluminum Casting Industries, Farm Equipment Industries, Automobile, Aircraft, Railways and Packaging Sector.**

Our Clients

We are proud to be a resourceful partner for clients such as **TATA, Reliance Industries Limited, LT, BHEL and ISRO.** Our clients not only cherish the quality we put forward through our range but, also vouch for their qualitative features.

Our Export Markets

We are an export company and so we have buyers not only in India but international market as well and our aim is to export our products in the overseas market in a time-efficient and safe manner. Our large distribution network and understanding about the market requirements have helped us in expanding our business overseas in countries like **Germany, Spain, Sri Lanka, Mexico, Saudi Arabia** and many other. Such expansion and impressive response in foreign nations is due to this reason that the range of **Heli-Coil Screw Lock Inserts, Heli-Coil Free Running Inserts and Heli Locking Nuts** offered by us are manufactured as per international quality standards.

Customer Satisfaction & Loyalty is Our Priority

To understand customer purchase intention it is important to understand their requirements and thus, the first thing we do is interaction with clients in which we take every little detail of what they expect from us and our products. Such methods of dealing with clients and executing the work process accordingly helps not only in attaining complete customers' satisfaction but their loyalty as well. Few of our highly satisfied patrons from all over the world are:
