# BIKES ROLL BETTER

## Company

The hub is important because it is the main weight-bearing component of the bike. The weight of bicycle and the rider, with all the rolling forces, bear down on the hubs. Amid today's varied and demanding bicycle-performance requirements. Bitex makes a wide range of bicycle hubs that offer :

- Superior strength & stiffness
- Longest lasting durability & reliability
- Lightest weight
- Smoothest rolling performance
- Best value
- Finest finishing colors

**BITEX INDUSTRIAL CO. LTD**  
[www.biteshubs.com](http://www.biteshubs.com)

This is the revolution to make the hubs-unique in the world  
Good quality / Best Service / Customers satisfaction

- Germany | Nr. 20 2015 106 474

## Innovative technology

One of the most common complaints about Alloy freehub bodies is how easily they can be gouged by cassettes, leaving ugly notches that make removing the cassette difficult. Introducing the new Bitex “Anti-Bite System” - three small, hardened stainless splines to our patented 6-pawl freehub body that will absorb the pressure of the steel cassette. Customers asked for a solution to freehub gouging, and we’ve delivered it.

**B team**

## How it works

New and improved design.

Two sets of three pawls - six in total - reduction in distance between points of engagement by 50%.

## Feature

1 / Lighter

2 / Durable : total 6 pawls, 3 pawls one turn, 2 turns work.

3 / Smooth : 54HD for MTB , 48HD for ROAD , high transmission efficiency.

4 / Easy to replace.

5 / The price depends on the bearings.

6 / Bearing options : Steel / Ceramic / Stainless Steel
