

## 8102E-5 Brief Introduction

**Industrials level, designed for professional user**

- \*For parallel & angled (0o-45o) cuts
- \*Steel base and support parts
- \*Die casting cutting assembly with ball bearing
- \*Replaceable cutting blades:  $\varnothing 20 * \varnothing 5 * 5 \text{MM}$
- \*Maximum cutting thickness: 16mm
- \* Breaking force: 1000kgs
- \* For all kinds of tile

## 8102E Brief Introduction

- \* Built-in roller bearings for superb cutting accuracy.
- \* Solid steel single guide with strong die casting aluminum operation lever pivotally installed

- \* Large size handle with comfortable rubber grip

## 8102E Brief Introduction

\*Big size extension bar to support of large tiles

\* Big size breaking feet to cut even top strong tile

\* Roller bearing scoring wheel ensures smooth scoring, size in 20x5x5mm ensures a scoring length of 2000 meters.

\* 15mm thick EVA pad ensure stable cutting action

# How to use

## 1. Straight cut

**Step 1**

**Pull the handle from the end to top to score**

**Step 2**

**Snap the end of the handle to break the tile**

**For all kinds of tile, cuts up to 16mm thick!!**
