

About Us

We would like to introduce our company **Aayur Lifesciences**, that has been supplying all microbiology range, clean room products in pharmaceuticals companies, hospitals, public testing labs, food, seeds and medical devices companies.

Aayur Lifesciences a vision to serve the pharmaceutical, hospitals, public testing labs, food, seeds and medical devices industries. achieving its goal, today it is renowned and appreciated for supplying and trading a high quality pharmaceutical microbiology range and clean room products to it's customers across the nation.

Aayur Lifesciences has been a dedicated supplier to the healthcare, lifesciences, pharmaceutical, biotech, food ,seeds, hospitals , medical devices and environment sectors globally.

Aayur Lifesciences is a leading suppliers of microbiology range of products plastic labware, disposable and autoclavable bottles, pyrogen free test tube for bet lal kit, racks, pipette tips, petri dish, centrifuge tubes, cryo vials, pipettes and a wide range of other products.

Product Quality

Our dedication towards innovation and research makes us unique – it is our commitment to best quality that makes laboratories around the world depend on us for consumables, reusable, instruments and more.

Product Range

- Bet (LAL) Bacterial Endotoxin Test Kit and Lab Reagents Accessories
- Pyrogen Free Tubes / Microtips
- Biological / Chemical Indicators
- Lab Glassware
- Disinfectants
- Microorganism ATCC Culture
- Sterile / Non Sterile Gloves
- Sterilization / Tyvek Reels and Pouches
- IPA / Hygiene Cleaning Solution
- Biochemicals
- Clean - Room Products
- Sterile Forceps / Loops / Spreader / Scissors
- Disposable Lab Coat / Autoclavable Garments
- Lab Instruments.

Healing healthcare together.

Bacterial Endotoxin Lal Test Kit. (Bet Test Kit)

Pyrotell was the first LAL reagent licensed by the US FDA. It is easy to use and is available in both economical Multi-Test Vials (MTVs) and convenient Single Test Vials (STVs). Pyrotell is a robust reagent, producing firm, easily read clots and is resilient to interfering substances. The gel-clot test does not require sophisticated equipment and software and is the simplest LAL test to implement.

Sensitivity :

Pack Size	0.125EU/mL	0.03EU/mL	0.06EU/mL	0.25EU/mL
5 ml	G 5125	G 5003	G 5006	G 2280
2 ml	G 2125	G 2003	G 2006	G 2250

Micropipette Tips

Cat No.	Pack Size.	Description of Goods
BMP250ES	100/No/P	Sterile micropipette tips (individually wrapped): 200ul
BMP1000ES	50/No/P	Sterile micropipette tips (individually wrapped): 1000ul (1ml)
BMP5000ES	25/No/P	Sterile micropipette tips (individually wrapped): 5000ul (5ml)
BMP1000ES	25/No/P	Sterile micropipette tips (individually wrapped): 1000ul (10ml)

Pyrogen Free Test Tubes

Cat No.	Pack Size.	Description of Goods
ALS1075S	50 Nos	10x75mm Depyrogenated Sodalime (reaction) Glass Test Tube
ALS1075B	50 No/P	10x75mm Depyrogenated Borosilicate (reaction) Glass Test Tube
ALS1275B	42 No/P	12x75mm Depyrogenated Borosilicate (Dilution) Glass Test Tube
ALS12100B	42 No/P	12x100mm Depyrogenated Borosilicate (Dilution) Glass Test Tube
ALS13100B	30 No/P	13x100mm Depyrogenated Borosilicate (Dilution) Glass Test Tube
ALS16125B	10 No/P	16x125mm Depyrogenated Borosilicate (Dilution) Glass Test Tube
ALS18150B	10 No/P	18x150mm Depyrogenated Borosilicate (Dilution) Glass Test Tube
ALS38200B	02 No/P	38x200mm Depyrogenated Borosilicate (Dilution) Glass Test Tube

Chemical Indicators

Chemical Indicators, integrators and emulators used for steam, eto, dry heat, hydrogen peroxide

- Process indicator tape for steam, EtO, dry heat & tape for depyrogenation.
- Class 4, 5 & class 6 indicator.
- Chemical process indicator steam, eto, gamma dots & labels.

Biological & Chemical Indicators

Biological indicators (SCBIs) for monitoring steam, (EO) ethylene oxide , dryheat , plasma & hydrogen peroxide.

- BI for liquid load
- Self in contained plastic vial
- Spores strips
- BI in capsule format
- BI for dry heat & deprogenation
- Spores suspensions vials.
- Self Contained Glass Ampoules with Negative Control
- BD test pack foe 134°C and 1°21 C for 10 min / 11 min / 15min / 16.9 min
- Self contained ampoule for low temperature steam sterilization (110°C-118°C)
- S S disc for steam/ hydrogen peroxide Biological Sillicone Gasket

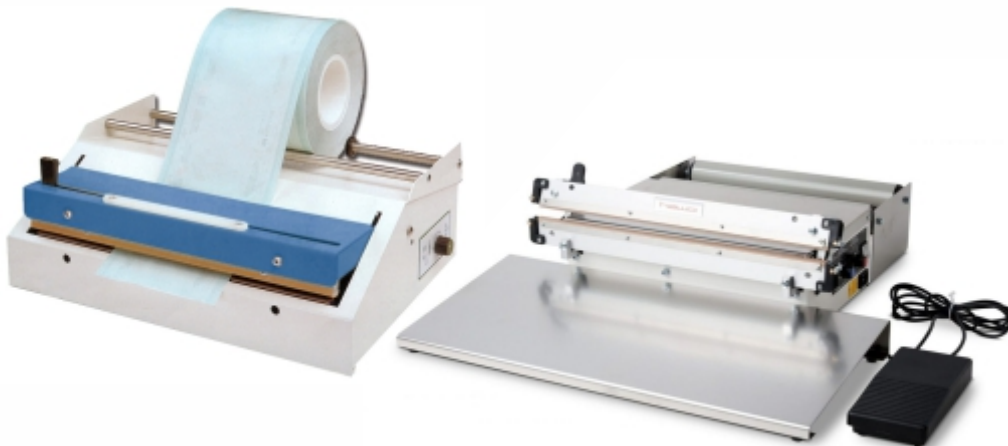

Sterilization / TYVEK Reels & Pouches Barrier Paper

Tyvek Paper Film Sizes

- 5cm X 200mtrs / 7.5cm / 10cm
- 15, 20, 25, 30, 40.
- 70 to 80 gsm

Barrier Crepe Wrapping Paper

- Manufactured from 100% medical quality cellulose. fibers suitable for steam, Eto & LTSSF
- Available in 50 CM, 75 CM, 100cm & 120 cm

Rotary Heat Sealing Machine / Impulse Sealer

- Rotary sealer without printing or with printing & validation
- Roll holder & cutter
- Seal check strip

SHOES FOR MEDICAL DOCTORS

ANR1907

Cyan

Orange

Black

White

Size : 37/38 39/40 41/42 43/44 45/46

Lightweight design

As Light as a swallow

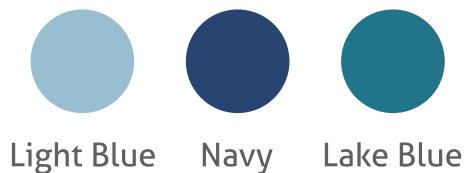

The simple shape and light design can reduce the burden of walking to a certain extent.

Non-slip sole

Increase friction

The non-slip rubber sole increases friction, and the graphic texture firmly grips the ground, making it safer to walk.

ANR1908

Size : 37/38 39/40 41/42 43/44 45/46

Breathable and comfortable

Breathable elephant nostrils

The side is like nostril vent design, good ventilation, effectively avoid liquid flowing into the shoes and avoid pollution.

Cushioning and soft

Ergonomic design

According to the ergonomic and anatomical design, it can effectively reduce muscle soreness and fatigue caused by standing for a long time.

ANR1906

Size : 37/38 39/40 41/42 43/44 45/46

Lightweight design

As Light as a swallow

The simple shape and light design can reduce the burden of walking to a certain extent.

The side is like nostril vent design, good ventilation, effectively avoid liquid flowing into the shoes and avoid pollution.

Non-slip sole

Boost robustness

Environmentally friendly plastic wear resistant material, coupled with ALS's non-slip texture, make the shoes more comfortable and durable.

Unique heel conductive pillar design

safe and anti-static

The black pillar material has a super conductive function. It is placed on the heel of the shoe. During the wearing process, the heel is connected to the ground through the electrostatic pillar, which conducts the static electricity generated by the first time, providing a good anti-static function.

TPE1003

Blue

Green

Size : 37/38 39/40 41/42 43/44 45/46

High resilience

Soft touch

The inside of the shoe is made of lightweight, cushioning, and decompression material developed by ALS, which is soft and comfortable and has good resilience, which improves the resilience and cushioning performance of the foot.

Non-slip sole

Boost robustness

Environmentally friendly plastic wear-resistant material, coupled with ALS's non-slip texture, make the shoes more comfortable and durable.
