DOUGLAS PINE WOOD

About Us

LN Timbers Ply LLP has made a strong presence in the market as a trusted manufacturer, supplier, importer, and trader of different types of wood including Ash Wood, Devdar Wood, Door Frame, Douglas Pine Wood, IPE Wood, and various others. These different types of woods are extensively used in the production of all types of furniture. Whether it is palatial beds, stylish sofas, royal chairs, charming designs of tables, or elegantly crafted almirahs, we have solutions for all. The wood range is carefully processed in our sawmill equipped with the latest tools and machinery.

We have plenty of varieties of wood in our range. The quality of the wood material is superb as we follow elaborate procedures in dealing with different challenges with wood that consumers may confront. Challenges, such as treatment to avoid infestation with borers or termites, warehousing, wetness of wood, and others. Wet wood is often susceptible to infestations with termites or borers that can make the wood hollow from the inside. Saving the wood from such menace is critical for us to maintain our positive image in the market. This has been our approach since the establishment and we will relentlessly work hard to take our company to greater achievements.
