Iron is ideal for cooking at high temperatures because its low capacity of heat transmission prevents temperature leaps. As it is non-stick, food does not stick to it. It withstands very high temperatures and improves its performance with use. Iron pans are perfect for fried food, omelettes or fine crêpes. Wash the black iron pan in water as little as possible and always keep it greased.

USA STYLE WASHRACKS: WASH, TRANSPORT AND STORE. ALL-IN-ONE.

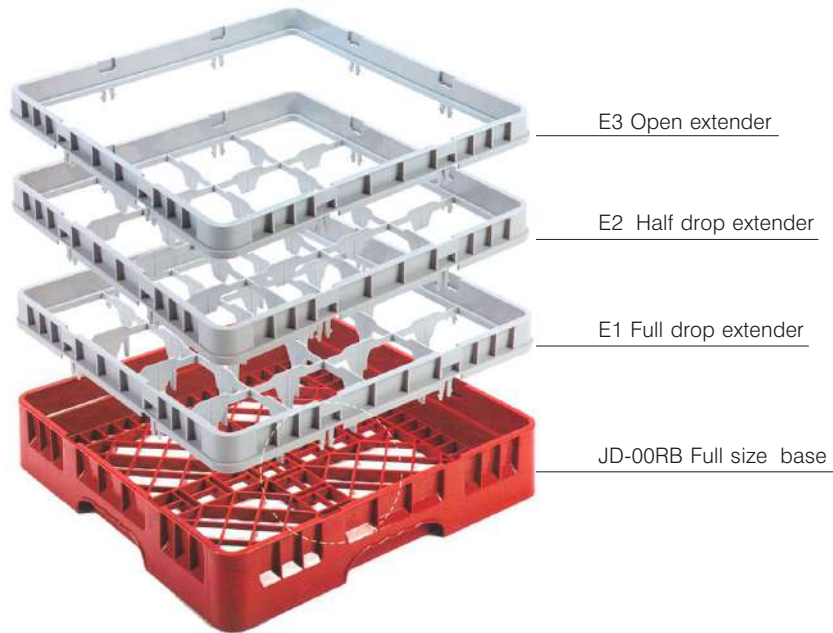

美式豪华款杯筐系列：集洗涤、存储和运输，功能合一

Color Coded
Inventory Control

1. Bright colors identify at a glance both contents and quantity per rack.
2. 5 base colors and 2 extender colors provide 10 color-coding options.
3. Gray extenders are standard unless beige extenders are specified.

Choose the correct dishrack:

1. Measure the maximum diameter of your glass (stemware or tumbler) to determine the number of compartments.
2. Measure the maximum height of your glass (stemware or tumbler) to the top edge of the rim to determine the compartment height.

DELUXE-INDUCTION CHAFERS 18-10 s/s

- With elegant design and practical function.
- The dish itself can be compatible with induction plates or along with matching frame for a more classic buffet environment.
- Heat source like induction plates, electrical warmer and sterno are all suitable.
- The patented hydraulic mechanism gives an extremely smooth lid motion. Gentle & silent opening & closing of lid which helps to define the class of a buffet.

LID POSITION

- Open up to maximum 90°
- Stays open at approx. 65°
- Initiate to close by pressing down gently
- Lid falls & closes automatically & silently

NOISE STOPPER

- Ease noise of closing lid

WATER RETURN SYSTEM

- Condensation flows back to water pan instead of food

CAPSULED BOTTOM

- Multi-layer bottom for fast & even heating

DETACHABLE LID

- For quick & easy cleaning

HYDRAULIC HINGE

- For smooth opening & closing of lid

ADJUSTABLE LEVEL SUPPORT

- For a perfectly level placement when required

INSET LIFTING PIN

- Changing food pan easily

Channeled Cover

Condensation accumulates in the dome cover and is transferred through the channel in the cover back into the water pan. Keeps the water out of the food and off the table.

Dripless Water Pan

The extra wide rim of the water pan does not allow food or water to drop below the chafier onto the table and creates a more stylish appearance.

Hinge Design

New hinge design works in the closed, 90-degree, and fully-open position using only moderate force to change position. No levers or switches required to operate.

Removable Cover

The new design includes a removable cover for easy cleaning.
