We provide advanced concept of innovation and development for easy operation and reliable performance of the machines. Synthetic leather production line is our innovative developed products and combined with this we are also provide Pvc synthetic leather Foaming line with Pin stenter machine frame. After calendaring process for Pvc leather Foaming methods is good effect and soft feeling tends to be the same as natural leather.

Foaming line production is high efficiency with the help of newly developed high performance drying system with pin stenter frame gives maximum quality and production capacity with the cost of minimum investment and maintenance.

Foaming oven reaches highly satisfactory production capacities by means of new developed nozzles and air circulation system.

Each Foaming oven is 3 meter long with high efficient thermal oil heat exchanger designed in order to get temperature. Individual temperature adjustment for each chamber.

Technical details:-
Working width : - 1800 mm
Working speed: - 30 m/min
