

BUTYRO REFRACTOMETER (LI-BREF-187)

APPLICATION :

This instrument can be used for measuring on oils, fats and waxes giving a reading directly in terms of the oil scale, otherwise known as BUTYRO Scale.

The instruments quit suitable to Milk plants, Oil & Ghee Industry, Education & Training to lab chemists in institutions.

FEATURE :

- Designed for quick and accurate measuring optical system by using few drops of sample.
- Instrument has dual scale.

TECHNICAL SPECIFICATIONS :

Butyro Scale	0 to 100 with 0.01 direct reading on micrometer
Sugar Scale	50 to 80% in 1 % accuracy
Accuracy	±0.5%
Temperature Control	By hot and cold water bath supply system
Thermometer	Attachable thermometer 0 to 100°C
