Digital Porcelain Tiles

Our Company produces digital porcelain tiles in sizes 300mm x 300mm, 400mm x 400mm. Being digitally printed, the customer gets a wide choice to embellish homes. These are manufactured for interiors and are long lasting tiles.

Vitrified Outdoor Tiles

Outdoors too need decorative construction. Looking at this need, the company has designed and developed process to manufacture high quality outdoor vitrified tiles. Suitable for swimming pools, parking and other outdoor applications, these tiles are available in 400mm x 400mm size.

Polished Glazed Vitrified tiles (PGVT)

The most valuable of the stable of Our Company are Polished Glazed Vitrified Tiles in sizes 600mm x 600mm, 600mm x 1200mm. While vitrification provides high strength, Glazing gives the rich shine to surface making the tiles elegant and beautiful.

With the combined strengths of technology, manpower, raw material and exquisite designs in a wide range, Our Company is your ultimate choice for high quality tiles.

TILE FIXING INSTRUCTION

1. Plaster the surface of the floor where the tiles will be laid with smooth finish and complete the plastering and curing at least two weeks prior to laying.

2. Before fixing Our tiles, lay them out in the desired pattern and make sure that they give an acceptable blend of colour. Please note that certain amount of shade variation is inherent in the manufacture of fully vitrified ceramic tiles. THE COMPANY WILL BEAR NO LIABILITY AFTER THE TILES ARE FIXED.

3. The company bears no responsibility towards the tiles exposed to any outside process like transfers, printing, firing, etc.

4. For fixing Our Tiles, we recommend the use of tile fixing adhesives for best results. Also follow the fixing instructions provided along with the adhesives.

5. For fixing Our tiles on the floor, using sand and cement, follow the instructions given below:

   a) Use cement and sand mortar in the ratio of 1:4. Add Some water to create a consistent paste.

   b) Once the mixing has completed do not add any further water and use the same within one hour.

   c) Apply a 20-30 mm, layer of bedding material over an area of 1 square meter at a time on the surface of the area. Apply a fine slurry to the back of the file to ensure proper and full bedding. Press gently for even adherence at the back of the tile. DO NOT USE AN IRON HAMMER OR SOME HEAVY MATERIAL TO PRESS THE TILE.

6. For fixing Our tiles on Dado, we recommend the use of tile fixing adhesive with proper troweling method for 100 percent coverage behind the tiles and for peerless bonding. Please follow the manufacturer's instructions for the same. We do not recommend the use of sand and cement for fixing on Dado.

7. Make and lay out tiles from the center of the area to be laid so that cut tiles, if any, will be on the outer edges towards the walls.

8. The work size which we try to maintain for better technical performace is 80omm x 80omm on average. it is advisable to maintain a gap of 1 mm to 2 mm between every two tiles to allow possible expansion as per BIS/EN tolerance norms.

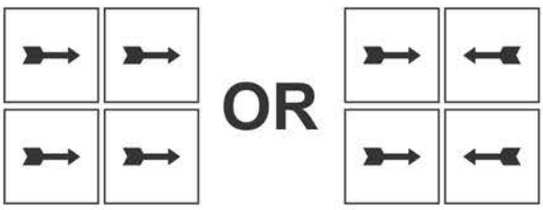
9. Complete the laying process by pressing the cut Our tiles firmly into place along the walls /floors.

10. Allow 3-4 days for bed curing after this period fill the joints with grouts. Usage of grout sealant is recommended for keeping the grout free of dust.

11. Fifteen minutes after finishing the grouting process, wipe off excess grout with a damp sponge and polish the tiles with a soft and dry cloth for a cleaned surface. The tiles can also be cleaned with a mild acid (However, Hydrofluoric acid and its derivatives should not be used).

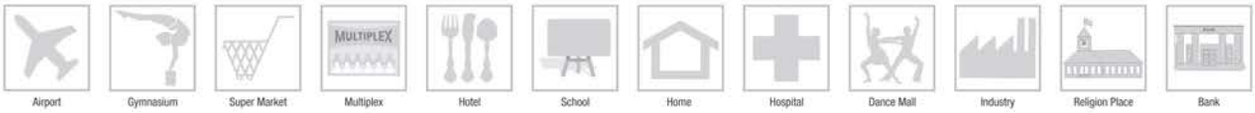
12. Please note that the company does not accept any liability in case of problems arising out of non-adherence to these fixing instructions.

Kindly look for the arrow (➡) on the back of the tile and follow the laying pattern as shown in Pic-1:-



Nothing in these instructions is Substitude for Good Workmanship and Supervision

APPLICATION



Note: Colour Shown are as accurate as the limitations of the printing process will allow. Prospective customers are advised to inspect a sample of the tile before ordering.
