TECHNICAL SPECIFICATION

1. If the wall is going to be plastered for a thickness of 12 mm and a tile thickness of 6-7 mm, the projection of the bolts from the finished wall should be 66 mm only.

2. If the thickness of plastering and tile is less than the dimensions mentioned above, the bolts that are supplied along with the bracker should be moved into the wall by using a suitable spacer washer between the bolt head and the bracket frame.

3. The bracket should be buried into the floor so that the height from the center line of the bolt to the surface of the finished floor is 320mm.
