● Company Introduction

Jinnys Co., Ltd is a company that manufactures the Alkaline water ionizer, a medical device, and has received recognition of its suitability for medical device manufacturing and quality control standards (GMP). We are growing mainly around exports to Italy, India, South-east Asia. We are currently exporting to more than 30 countries and are committed to becoming a leading player in the export market.

We have won various awards from government agencies and organizations in Korea and received the ‘Tower of 1 Million Dollar Export’ in 2017.

We established the mission of “we share the innovation of Beauty & Health and develop our brand name ‘mediqua’ Under the management policy that the world is wide and still has a lot to do.

We would appreciate it if you could support the growth of “mediqua” and “Jinnys”

● Items (품목 및 제품명 등 한글로 간단한 소개)

It is effective in improving the 4 major gastrointestinal symptoms (chronic diarrhea, indigestion, abnormal fermentation in the stomach, excessive stomach acid).

CREWELTER

ENKION

Alkaline ionized water is quicker to absorb into the body because its size is smaller than that of ordinary water. It is effective in improving the 4 major gastrointestinal symptoms (chronic diarrhea, indigestion, abnormal fermentation in the stomach, excessive stomach acid). In addition, since the human cells are weakly alkaline, It helps to grow, regenerate and produce cells. Not only for drinking, but also for cooking food, washing fruits, vegetables, and skin. "Mediqua" meets the demands of the trend, which is interested in daily necessities such as health & skin care.
