Brand Story

실리만이라는 사람이 있습니다.
그는 과학자인 동시에 인문학자이며 크리에이터이자 마케터입니다.
그러나 그가 흥미로운 이유는 다른 데 있습니다.

그는 기발하다 못해 엉뚱한 생각이, 엉뚱하다 못해 해괴망측한 생각이 세상을 바꿀 것이라고 생각합니다.
그는 자신이 천재라고 주장하는 대신에 사람들이 가진 천재적인 직감에 관심을 가진 사람입니다.
그리고 이 엉뚱하고 기발한 생각을 구현하기에 실리콘보다 더 적합한 소재는 없다고 생각하고 어느 날 일을 벌이기로 결심했습니다.

기존의 메이커들의 트렌드와 소비자를 분석하고 수십 가지 조사 끝에 제품을 만드는 것과 달리 그는 사람들의 생각을 열심히 듣기로 했습니다. 단 한 사람이라도 원하는 실리콘을 만들겠다는 생각. 백 가지 조사보다 한 사람의 생각이 더 중요하다 믿는 사람! 이렇게 심플하고 과감한 생각을 했던 마케터가 세상에 또 있을까요?

'나는 어리석어. 그래서 모든 것을 다 할 수 있는 용기가 있지!'
그를 실리만으로 부르기 시작한 이유가 여기 있습니다. 실리만의 아이디어가 펼쳐질 첫 번째 공간은 주방입니다. 실리만 키친웨어의 활약이 기대되는 이유는 요리의 개념을 바꿔놓을 것이기 때문입니다. 주부를 주방에 가두는 힘든 노동이 아니라 호기심을 자극하는 즐거운 놀이터로!

그는 실리콘으로 세상을 바꿀 수 있다고 믿는 유쾌한 브랜드, 실리만입니다.
Be silly! Play Silicone!!

There was a person who called Sillymann.
He is a scientist, humanistic scholar, creator and marketer at the same time.
However, he had other reason to call "An interesting man".

He is thinking that he could change the world with his curious, silly, funny and incredible idea.
He is not calling himself as "genius" but he is interested in "genius idea."
Then, he made decision no material could be better than silicone to make this idea to be real in the world and do it someday.

He chose to listen what people thinking rather than researching the trend of products and customer what normally company does.
He chose the idea of even one man to design creative one.
A man's thinking could be more important than hundreds of researching.
Is any marketers could think these simple and drastic idea?

"I'm silly. So I have 'COURAGE' to do anything!"
This is the reason why people start to call him as "Sillymann".
The 1st dramatic ideal space is kitchen. We could expect dramatic sillymann's product because it will change the ideas of kitchen.
Now, kitchen is going to be curious play space not just working space.

He believes silicone can change our life style.
Be silly! Play Silicone!!

Silicone Feature

What is silicone ?

Sand of Magic

실리콘을 구성하는 기본물질은 석영(QUARTZ)이라 불리는 Silica 또는 산화 규소(SiO2)이며 이는 주위에서 쉽게 접할 수 있는 자연 모래의 주성분으로 친자연에서 추출한 친환경 소재 입니다.
Silicone's basic material is sand or SiO2, with main ingredient natural sand is friendly material from natural resource.

Silicone Age

석기 시대, 청동기 시대, 철기 시대하고 부르듯이 2000년에서 3000년대로 넘어가는 이 시기를 실리콘 시대라고 부르게 될지도 모릅니다. 왜냐하면, 마이크로 칩, 트랜지스터, 태양전지, 반도체, 우주공학, 광통신 등 첨단 산업의 재료이기도 하지만, 매일 사용하는 삼푸, 비누에도 실리콘 오일이 함유되어 있고, 의료기구의 튜브, 성형 보형물, 또한 유아용 젓꼭지, 주방용품 등 실리콘은 이미 우리 생활 속에 깊숙이 파고든 친숙한 소재이기 때문입니다.

This year, we might call a "silicone century" as we called 'the stone age', 'the Bronze Age' and 'the Iron age' for 2000-3000 years. Because, it is material of hi-tech industry such as micro-chips, transistor, solar battery, semiconductor, space engineering and optical communications, but it is used in shampoo, soap(silicone oil included), tube of medical product, product of plastic surgery, baby nipple bottle and kitchen ware etc, as friendly material in our life.
