Special Features of WATERS Water Purifying System.

Superior Purifying Performance

With a purifying method that involves more than 4 stages and a multi-layer activation method, WATERS completely eliminates residual chlorine and organic chemical substances, as well as heavy metals and bacteria. This purification system provides the cleanest and safest water in the world.

Alkaline Reduced Water

The water purifier used in WATERS generates reduced water, shrinking the size of the water cluster. This small water cluster washes up acidic waste matters in every nook and cranny of the human body. In addition, alkaline reduced water can delay excessive oxidation and the aging process of the human body.

Mineral Water

WATERS water purifier slowly resolves mineral elements into water, providing abundant minerals that are friendly to the human body by applying the principle of natural water from base rock and using multiple layers of natural minerals.

Magnetized Hexagonal Water

When water passes through magnet with thousands of gauss, clusters of water are distributed more closely, becoming a crystalline structure with a hexagonal shape that will be absorbed into the cells of a human body more rapidly.

Far Infrared Rays

By emitting abundant far infrared rays into purified water and activating cellular tissues using unique mineral materials, WATERS provides water that is effective in the prevention of various geriatric diseases.

Antibacterial Potency/Sterilization

It removes the bacteria, E.Coli. And the filter is used to prevent the purified and activated water from bacteria propagation and contamination in the container.

Long lifespan of filters and Economic value

The WATERS water purifier is designed to handle large amounts of water with a low maintenance expense, providing excellent purifying performance at a competitive price. It is also designed to be used without any complex installation, making it even more convenient.

WATERS TECHNOLOGY

Our water purifying system is the combination of all the water purifying technologies. We select all the merits of each water purifying system and combine these into one system

WATERS Ceramic Pot SERIES

BIO CERAMIC PREMIUM LOVE

It generates mineral water full of vitality and spirit of nature, applying the principle of generation of natural minerals and natural bedrock water.

BIO CERAMIC PREMIUM LOVE White & Black

■ Filter Composition : Super Compound (2pcs), Nano Shutter(1pc), Bio Mineral(2pcs), Ultra Block(1pc), Alion Ceramic(1pc), Magnets

MODEL	BIO CERAMIC PREMIUM LOVE
Size	235 X 375(H)mm
Total Weight	9.25 kg
Container Capacity	7 Liter
Storage Capacity	3 Liter
Reservoir Material	Ceramic
Water Supply Type	Automatic

BIO CERAMIC POT / JADE

Ceramic maintains the natural freshness of water !

This is a product that integrates all of the technologies of WATERS.

As the water container is made of ceramic, far infrared ray and the negative ions of ceramic help to keep the water fresh for a long time, preventing it from being contaminated by Endocrine Disruptors.
